

SAURAV DHUNGANA

AI / ML Engineer

Kathmandu, Nepal | +977-9817333320 | sauravdhungana.official@gmail.com | linkedin.com/in/sauravdhungana12

PROFESSIONAL SUMMARY

Entry-level AI/ML Engineer with hands-on internship experience in healthcare AI, predictive modeling, and deep learning using Python, TensorFlow, and Scikit-learn. Builds end-to-end ML systems — from data preprocessing and feature engineering to model deployment — and has shipped multiple applied projects including CNN-based diagnostics, NLP chatbots, and RAG-based AI products. Brings a versatile background spanning content strategy, UI/UX, and digital marketing, with strong communication and cross-functional collaboration skills. Actively building toward graduate study in AI/ML in Germany.

EXPERIENCE

AI / ML Intern — E-Prabidhi Pvt. Ltd

Dec 2024 – Feb 2025

- Applied Python, Pandas, Scikit-learn, and TensorFlow/Keras to real-world ML projects, including data preprocessing, feature engineering, and model tuning.
- Built and evaluated ML models for disease prediction and medical data analysis, improving model accuracy by ~10%.
- Developed CNN-based deep learning models for medical image classification using TensorFlow/Keras.
- Collaborated with a development team using Git and GitHub in a professional workflow.

UI/UX Designer Intern — Quasar Technology

- Designed wireframes, user flows, and prototypes in Figma; improved usability through iterative testing and feedback.

Email Designer — Locus Media / VistaMails

- Designed and optimized high-converting email campaigns and templates for multiple clients, improving open and click-through rates.

SELECTED PROJECTS

GermanMatch AI | FastAPI, pgvector, BAAI embeddings, Gemini API (RAG), Playwright/BeautifulSoup

SaaS platform helping international students find English-taught Master's programs at German public universities, with a RAG-based advising pipeline and automated program-data scraping.

AI Brain Tumor Detection System | TensorFlow, Keras, OpenCV, NumPy

CNN-based deep learning model classifying brain MRI scans to support automated diagnosis — achieved ~88% validation accuracy.

Second Brain Bot v2 | FastAPI, BAAI embeddings, Gemini API, SQLite vector search

Personal knowledge-management RAG assistant enabling conversational search over ingested notes.

AI Disease Prediction System | Python, Scikit-learn

ML models trained on healthcare datasets to predict disease risk from patient symptoms — achieved ~85% prediction accuracy.

AI Health Advice Chatbot | Python, NLTK/spaCy, Flask

NLP-based chatbot providing interactive, symptom-based health guidance.

Movie Recommendation System | Python, TF-IDF, cosine similarity

Content-based recommendation engine delivering personalized movie suggestions.

TECHNICAL SKILLS

ML / AI: Python, TensorFlow/Keras, Scikit-learn, Pandas, NumPy, NLP (NLTK/spaCy), RAG pipelines, embeddings, vector search, Gemini API

Backend & Tools: Flask, FastAPI, SQL, Firebase, Git & GitHub, REST APIs

Also Experienced In: UI/UX (Figma, Canva), Copywriting & Email Marketing, SEO & Google Ads, Requirements Analysis & Power BI

EDUCATION

Bachelor of Computer Application (BCA) — Tribhuvan University, Nepal (Completed)

CERTIFICATIONS

Google Ads · HubSpot Content Marketing · SEO Fundamentals
